Portfolio

SKILL SET

- Java 14,17 | Hibernate ORM
- Spring Boot 3.0 | Micronaut 3.10
- RESTful Web Services
- Database(MySQL8.0,PostgresSqL 14)
- Microservices | Docker
- HTML5 | CSS3 | JavaScript
- Artificial intelligence | Prompt Engineer
- Data Structure & Algorithms

TOOL SET

- Build Tool: Maven, Gradle
- Version Control: GitHub, Bitbucket, GitLab
- Testing: Postman, JUnit, Mockito, Bruno
- IDEs: IntelliJ IDEA, Eclipse STS
- Collaboration Tools: Jira, Slack, Teams
- OS: Linux, Unix, Windows
- Other: Agile methodologies

EDUCATION

Full Stack Web Development(Full-Time)
Masai School, Bengaluru.
March 2022 - April 2023

Mechanical Engineering
MES College Of Engineering, Pune.
June 2017 - May 2022

PROJECTS

SeaGrainVue

To improve Cloud Cost Management, a multi-cloud FinOps solution was developed. Utilizing native APIs and SDKs, I contributed as a backend developer to the development of useful modules for the study of cost and service data from Amazon and Azure Cloud Service Providers. Utilizing the Micronaut Framework, the solution is built on a microservices architecture.

Tech Stack : JAVA | Micronaut | Gradle | JavaScript | ReactJS | CSPs

Areas of responsibility:

- Sign-in APIs with all security authentication and authorization using micronaut security.
- Microservices, Mult-tenant application.
- Multiple Database connection, connection pool configuration.
- Azure AD authentication, AWS Data rendering using AWS SDKs.
- Consul and Vault Configuration.
- Deploying the microservices (Azure, Digital Ocean)

A collaborative project built by **4 members in a span of 6 months**.

Automated Auction System

SQL Database project

Automated Auction System is an Application Software that is used for the buying and selling of products.

Features :

- Sign up/ Sign in: Admin | Buyer | Seller
- Buy and Sell Item
- Admin can manage buyer and seller
- Admin can resolve dispute reports

Tech Stack : My-SQL | Java | JDBC

An Individual project completed in 4 days.

EXPERIENCE

Software Developer | HCLTech

Client: Northwestern Mutual, Milwaukee, USA

Aug2024 – Current | Nagpur, India

Roles & Responsibilities

- Developed and maintained REST APIs using Java and Spring Boot.
- Performed daily deployments of multiple microservices.
- Monitored production logs and resolved live application issues.
- Worked on the Entitlement Service, implementing enhancements and bug fixes.
- Investigated production incidents and supported microservices.
- Collaborated with cross-functional teams in an Agile environment.
- Mentored freshers and provided technical guidance.

Key Skills

- Java
- Spring Boot
- REST APIs
- Microservices
- Production Support
- Deployments
- Log Monitoring
- Git
- Agile/Scrum

Software Engineer | Cloudoniq Technologies

Aug 2023 – March 2024 | Nagpur, India

Java Development:

- Spring: Scalable apps, RESTful APIs, secure architecture with Spring Boot, MVC & Security.
- Databases: Seamless integration with diverse databases using Hibernate ORM for efficient data management.
- Microservices: Designed & developed cloud-native microservices using Micronaut.
- Quality & Performance: Comprehensive testing (JUnit) & code reviews for maintainable, high-performing code.

Cloud Service:

- AWS (EC2, cost optimization, IAM, Trusted Advisor)
- Azure (AAD, Container Registry, Container Apps)

Additional Expertise:

- Multitenancy Architecture: Designed and implemented secure multi-tenant environments within a SaaS-based platform, ensuring data isolation and customization for diverse user needs.
- Consul and Vault: Strategically leveraged Consul for configuration management and Vault for secure credential storage, adhering to best practices for secure and accessible configuration data.
- Razorpay Integration: Successfully integrated Razorpay payment gateway into a SaaS product, facilitating seamless payment processing and enhancing user experience

Backend Developer | Masai School

March 2022 – Aug 2023 | Bengaluru, India

Worked as a backend developer with the level-up development team.
